## Transfer Solutions

Our transfer solutions have been tested according to several European standards to protect against fire, burglary, explosion and fire. They are delivered as complete items with communication systems.

We offer delivery and assembly at fixed prices throughout the country and abroad by agreement. It is carried out by our specially trained technicians and we prepare installation declaration as documentation.

## Sealing

We have a large product range from one of the world's largest manufacturers.

We provide high-security seals, security seals and indicative seals as well as bags, envelopes, tapes and labels.

We also provide sealing solutions for containers, anti-theft tank protection and weapon locking.

## Cash Management

We provide cash protection systems such as time-delay and duress deposit boxes and cash drawers for customer service.

We have delivered to several of the largest banks and retail chains in Denmark.

In addition to our standard range, we can develop different systems according to special wishes.

## Key Management

We have a full range of key management products, whether it's key safes for depositing auto keys, intelligent internet-based key safes for 10,000 keys or common theft-proof key safes.

## Safes

For more than 50 years, we have provided safes and fire safes. We have a unique product range of tested and classified products at some of the best prices in the market.

All our solutions are available with different types of locks - from key lock to electronic lock.

## Pictograms

We were the initiator of the Danish Standard for Security Pictograms and had the chairmanship of the Danish Standard Working Group. The original pictograms were developed with support from, among other, the finance and retail sectors.

We continuously design new pictograms in collaboration with industry organizations as well as in connection with specific projects or product development.

## Theft Marking

Our solutions for theft marking are to a large extent also branding. The marks are manufactured in such a great quality that, for example, a laptop with Safety House Theft Marking helps to brand the company, municipality or institution that owns the equipment.

In addition to that, theft marking is a great preventative effect, and the marking can be combined with preventive pictograms.

## Body Worn Cameras

Our body worn cameras are completely unique body worn point-of-view video systems.

The cameras are manufactured in a single, solid, user-friendly and crime-prevention camera design that ensures many years of trouble-free use and effective crime prevention. The cameras also feature advanced technology and software that can be upgraded continuously.

## Evidence Database

Our software for digital evidence and event management consists of a complete platform of cloud based applications and APPs. Digital evidence can range from data from our body-borne camera to videos, photos and sound recordings from all possible digital media.

Our solutions are used by authorities for public proof management, as well as by parking officials and guardians. One of the unique benefits is tagging and proof sharing with full logging of all events.

## Vehicle Cameras

We provide a unique video system for vehicles with advanced features and at a price that is a fraction of the traditional systems.

The camera technology is based on our body worn cameras, but is specially developed with a range of solutions for internal and external monitoring of vehicles. The cameras are normally placed on the vehicle dashboard.

## Interview Room Cameras

Our interview cameras are solutions for video and audio recordings in interview rooms - such as interrogation rooms.

The solution ensures that no details are lost and high quality video and audio are used - all built into one single solution.

The solution is integrated with the evidence database Evidence.com, so recordings of witnesses, suspects and shoplifters can easily be tagged with description and automatically transferred to authorities with more.

## Tasers

Tasers are internationally recognized as one of the most important law enforcement tools.

They can both be a substitute for and/or a supplement to, for example, guns and pepper spray. Tasers are harmless to humans, but are both preventive and extremely effective.

Taser are the most technologically advanced 'Smart Weapons' ever produced.

## Technical Service

Our service organization and service technicians are all specially trained and certified in security technology and crime prevention. We are classified to service customers with the highest security requirements within all our areas of competence.

It is our technicians who perform installation and service as well as delivery and project management.

In addition, we have a security-approved, reliable and professional team of collaborators. They all work under our quality assurance and personal approvals.

All technicians carry ID cards, and it can clearly be seen that they work for Howeni Eurosafe A/S.

## Mission

Our overall mission is securing people and values.

Our ambition is to be the most respected, preferred and most serious competence partner for our customers, partners and suppliers.

## Family owned

Howeni Eurosafe A/S is family owned and owner led since 1986.

The cooperation with all our customers is characterized by personal relationships, trust and confidence.

Basically, you need to know that you can trust us. Now and in the future – as well personally and as a company.

## Product areas

We have structured the company in few focus areas to ensure the best products and solutions. It is our ambition to be the market leader in all of these product areas.

We cooperate, of course, with the industry in order to develop and deliver complete solutions

## Experience

Howeni Eurosafe A/S was established in 1963 and therefore has over 50 years of experience with security and safety.

We have well over 20,000 customers and have delivered over 100,000 products and many are still operating. Each of our key employees has over 10 years of experience with security and prevention and the average seniority is 13 years.

## Customers

Howeni Eurosafe A/S primarily supply directly to end-users.

Our customers have a professional attitude to security and risk management. Often the customers' insurance companies, insurance brokers as well as advisers and architects refer customers to us. Together we uncover your risks and from a risk assessment recommend you the best security solution.

We also offer concepts and special agreements with trade associations, retail chains, insurance companies, purchasing groups and others

## Fairness

Our ambition is always to be competitive from a Fair Price philosophy - we will always supply the right solution for you, and the price must be fair to all parties.

We will all make sure that we do our best to ensure your extraordinary satisfaction.

## Why us

When we ask our customers why they choose Howeni Eurosafe A/S as partner and supplier, we are proud of the answers: Professionalism, credibility and recommendations.

## Core competences

We distribute, manufacture and develop security products and solutions.

Some of our products and solutions are developed in cooperation with our customers. Others are developed based on our market experience through more than 50 years.

In addition all products are branded Howeni Eurosafe and we have full overview of all products supplied.

## Quality

We are constantly focusing on professionalism, quality and project management.

Most of our products are manufactured in ISO 9001 certified factories. Howeni Eurosafe A/S was the first in the industry in Denmark, being DS / EN ISO 9001 certified for "Project planning and design, installation, service and maintenance of mechanical security".

This quality focus with our customer-driven culture means that we deliver an extremely good customer service.

## Hotline

We have hotline support weekdays between 08:00 and 16:00.

If we cannot solve the problem by phone then we have technicians, who aim to serve you across the country. Outside normal business hours, you can contact our hotline on the same main number.
